PROFILE

Wherever you want to go, Cascadia 4 will take you there. Its brilliant blend of cushioning, traction, and support will help you conquer any terrain and any surface. Just point, and go. And now, thanks to its environmentally friendly BioMoGo midsole, you can leave a smaller carbon footprint as you tackle that next dirt trail.

MIDSOLE

- Rearfoot HydroFlow® ST
- Forefoot HydroFlow®
- Full-length BioMoGo
- Full-length S-257 Cushsole
- Heel Pivot Posting System
- Forefoot Pivot System
- Forefoot Ballistic Rock Shield

 **HYDROFLOW®** | Dynamic viscous fluid units for heel and forefoot enhance midsole cushioning—attenuating shock with industry-leading dampening and comfort.

 **BIOMOGO** | We've taken the long-lasting cushioning of our MoGo midsole and made it environmentally friendly. How, you ask? By adding a non-toxic, natural additive to the MoGo compound that encourages anaerobic microbes to munch away once it hits the landfill.

 **S-257 CUSHSOLE** | Durable, energy-efficient midsole compound utilized as an insole board for even more cushioning and flexibility.

 **PIVOT POSTING SYSTEM** | Independent, medial-lateral pivot posts are shaped to minimize ground contact surface area, reducing the destabilizing effect of trail irregularities.

 **BALLISTIC ROCK SHIELD** | Toughened thermoplastic EVA sheath between the outsole and midsole protects the forefoot by spreading out point loads from sharp objects.

OUTSOLE

- HPR Green

 **HPR GREEN** | This durable and long-wearing outsole compound is made with dispersed silica, resulting in premium wet-dry traction for excellent skid-resistance and a more environmentally friendly composition.

UPPER

- Moisture-managing Element Mesh
- Microfiber Overlay Materials
- Synthetic Overlay Materials
- Moisture-managing Element Linings
- Hydrophobic Foam Package

 **ELEMENT** | Upper technology featuring superior microfiber construction to provide weather protection in a light, supple, quiet fabric that doesn't sacrifice breathability, durability, or comfort.
