PROFILE

There's nothing spooky about this high-end performance shoe built for the neutral, biomechanically efficient runner who wants to go fast. The Ghost's articulated, hyper-flex contact rubber outsole provides a resilient experience with every step, while its sprung toe and contoured arch give a secure mid-foot wrap and spectacular toe-off. Now that's what we call friendly.

MIDSOLE

- Rearfoot HydroFlow® ST
- Forefoot HydroFlow®
- Full-length MoGo
- Dual Density DRB® Accel
- Full-length S-257 Cushsole
- Sprung Toe Construction

 **HYDROFLOW®** | Dynamic viscous fluid units for heel and forefoot enhance midsole cushioning—attenuating shock with industry-leading dampening and comfort.

 **MOGO** | Our new midsole compound provides a soft cushy first feel that lasts—without sacrificing stability. In-house and accredited third-party testing showed that in comparison with Substance 257, MoGo offers a 40% increase in cushioning, 22% more energy return, and 33% less fatigue.

 **DRB® ACCEL** | Enhances tunable torsion of the midfoot. Shanklike thermoplastic devices vary from single units of a set modulus, to dual unit versions of varied modulus (one tuned with higher stiffness for medial support, the lateral side less stiff to smooth the ride).

 **S-257 CUSHSOLE** | Durable, energy-efficient midsole compound utilized as an insole board for even more cushioning and flexibility.

OUTSOLE

- HPR Plus
- Engineered Hyper Pod Configuration
- Contact Rubber Forefoot

 **HPR PLUS** | A higher durability, abrasion-resistant rubber outsole compound that wears longer.

 **ENGINEERED HYPER POD CONFIGURATION** | Midsole and outsole components are engineered to set the foot up in an efficient, balanced position from heel strike to toe-off, offering maximum stability and flexibility.

UPPER

- Ortholite Sockliner
- Moisture-managing Element Mesh
- Synthetic Overlay Materials
- Moisture-managing Element Linings

 **ELEMENT** | Upper technology featuring superior microfiber construction to provide weather protection in a light, supple, quiet fabric that doesn't sacrifice breathability, durability, or comfort.
