**PROFILE**

Plush gets plusher when the new Glycerin® 7 hits the ground—running, of course. With two layers of MoGo stacked in the heel and shock-dampening e<sup>1</sup> material sandwiched between, the Glycerin® 7 is already a luxuriously cushioned ride. Add to that a layer of tuned MoGo for extra softness and resilience in the forefoot, and this high-end neutral shoe takes home the plush prize.

**MIDSOLE**

- Rearfoot HydroFlow® ST-XL
- Forefoot HydroFlow®
- Full-length BioMoGo
- e<sup>1</sup> Rearfoot Polymer
- Dual-density DRB® Accel
- Full-length S-257 Cushsole
- Universal Sprung Platform

 **HYDROFLOW®** | Dynamic viscous fluid units for heel and forefoot enhance midsole cushioning—attenuating shock with industry-leading dampening and comfort.

 **BIOMOGO** | We've taken the long-lasting cushioning of our MoGo midsole and made it environmentally friendly. How, you ask? By adding a non-toxic, natural additive to the MoGo compound that encourages anaerobic microbes to munch away once it hits the landfill.

 **e<sup>1</sup>** | Midsole/outsole compound works in conjunction with HydroFlow® and MoGo to progressively dampen the forces of energy that occur during the contact phase.

 **DRB® ACCEL** | Enhances tunable torsion of the midfoot. Shank-like thermoplastic devices vary from single units of a set modulus, to dual-unit versions of varied modulus (tuned with higher stiffness for medial support, the lateral side less stiff to smooth the ride).

 **S-257 CUSHSOLE** | Durable, energy-efficient midsole compound utilized as an insole board for even more cushioning and flexibility.

**OUTSOLE**

- HPR Plus
- Forefoot Cush Pod Construction
- Flexalon Rubber Forefoot

 **HPR PLUS** | A higher durability, abrasion-resistant rubber outsole compound that wears longer.

 **ENGINEERED CUSH POD CONFIGURATION** | Midsole and outsole components are engineered to set the foot in an efficient, balanced position from heel strike to toe-off, offering maximum cushioning and flexibility.

**UPPER**

- Ortholite Sockliner
- Moisture-managing Element Mesh
- Microfiber Overlay Materials
- Synthetic Overlay Materials
- Moisture-managing Element Linings

 **ELEMENT** | Upper technology featuring superior microfiber construction to provide weather protection in a light, supple, quiet fabric that doesn't sacrifice breathability, durability, or comfort.
